13. Other: _____.

Continuation of 11. does NOT place the application in condition for allowance because: Applicant argued that the art on record fails to teach determining physical portions of the storage device that have been modified since a previous virus scan using information about the physical portions without using information about a file structure, a file system, or a file type and ...scanning is performed without using information about a file structure, a file system. Examiner disagrees. Examiner would point out that, as discussed in the previous office action Waldin (US 6,094,731) teaches scanning at least parts of the physical portions for viruses, wherein scanning performed without using information about a file structure, a file system or a file type [column 6, lines 43-46, column 7, lines 37-46, column 3, lines 5-45]. Waldin et al. specifically teaches scanning for viruses regardless of the content of the sectors [column 7, line 64 - column 8, line 8] and regardless of the file format [column 3, lines 40-45], which meets the claim language. Examiner asserts that Waldin et al. teaches the claim limitations and therefore the rejection is respectfully maintained.
